## Connectivity Service

Interoperability and government mandates

**For growing businesses, e-invoicing is no longer a choice.**

International businesses face increasing pressure from buyers and national tax authorities to exchange structured e-invoice data rather than traditional paper and PDF invoices. The exchange of these structured e-invoice data files occurs through a variety of different B2B or B2G channels and networks, each with their own set of requirements. Consequently, managing daily operations and ensuring a smooth cash flow becomes more complex for organizations.

---

### Why the shift to electronic invoicing?

#### European tax mandates

The European Union and its member states are actively promoting e-invoicing as a means to enhance efficiency, cut costs, and combat Value Added Tax (VAT) evasion. Although the EU created a directive that outlined a desire to build and adopt a pan-European e-invoicing standard, individual countries within Europe still retain the authority to define their own regulations for e-invoicing, including preferred channels and formats.

#### Accounts Payable Platforms

The rising demand for AP/customer portals highlights their significance, yet managing them efficiently can prove challenging for suppliers in the absence of automation. E-invoicing emerges as a solution, streamlining processes, saving time, and reducing expenses for over-extended teams while ensuring customer satisfaction remains a top priority.

---

## Billtrust makes staying connected possible.

With hundreds of different invoice networks (and more in development), maintaining connections to them all is an extremely time-consuming, complex, and costly process. Fortunately, Billtrust has established those needed connections across B2B and B2G invoice networks, making these delivery channel connections easily available to customers through our Billtrust Connectivity Service.

### Solve compliance challenges

- Understand national regulatory e-invoicing requirements and latest developments
- Set up connectivity to national tax-owned invoicing platforms
- Eliminate the need to work with local providers per country

### Solve AP Platform challenges

- Remove manual keying from AR teams
- Quickly upload invoices and get them ready for payment
- Avoid invoice errors and corrections
- Improve buyer satisfaction

---

## How can Billtrust help?

Your Billtrust team is standing by to help.

Building connections to B2B and B2G invoice networks is often difficult and time consuming. [Contact our sales team](#) to learn how we can help you simplify and eliminate unnecessary complexity.
