Billtrust Solutions for Transportation

Transforming accounts receivable with AI and automation

The transportation industry demands financial processes as reliable as its delivery operations. Accounts receivable processes plays a crucial role in managing cash flow across multiple freight audit portals, billing structures, and payment channels. Ai-powered AR solutions help transportation companies automate manual processes, streamline portal integrations, and provide seamless experiences – creating the financial foundation needed to fuel your growing transportation business.

Billtrust is trusted by hundreds of equipment companies who have digitally transformed their accounts receivable operations and are realizing positive business outcomes. Our AI-powered software improves accuracy and efficiency of invoicing, credit and collection, and cash application, while arming you with insights and intelligence that improve your business. Our payments platform allows you to create your own policies, streamlines management of multiple modalities and automates the process resulting in faster payments.
