INVOICING

Accelerate invoice processing with AP Portal Delivery

Streamline invoice delivery and status tracking across 260+ AP Portals to significantly reduce DSO

As buyers demand for AP Portal invoice submission increases, AR teams often struggle to keep up, causing invoice delays, increased DSO, and disrupting cashflow. Billtrust's AP Portal Delivery, an extension of our Invoicing product suite, eliminates the need to manage several buyers on multiple AP portals, allowing AR teams to focus on more critical, value-added tasks.

With support for over 260 AP Portals, your invoices will be uploaded swiftly, in the correct format, and ready for payment. A fully automated Invoice Status service facilitates tracking the status of all invoices, transforming fragmented reporting into a single, actionable dashboard experience. AP Portal Delivery not only helps you proactively meet buyers' needs but also accelerates your payment receipt, improving your cash flow.

"Billtrust has been a game-changer for our order-to-cash process. Their solutions handle everything from cash application to invoice distribution and customer portals, making our collections management more effective than ever."

Avron Cohen, Director of Corporate Finance
Daylight Transport
