

# Business Payments Network Invoicing

Business Payments Network (BPN) Invoicing offers bidirectional connectivity to over 170 Accounts Payable (AP) Portals on behalf of Business-to-Business (B2B) billers. BPN Invoicing customers optimize both sides of the transaction with the ability to automate invoice delivery and receive invoice status updates. Major AP system vendors such as Ariba, Coupa, Taulia, Tungsten and Transcepta are included, as are buyer-specific portals for companies such as 3M, John Deere, Johnson & Johnson and many others.

The list grows every month as Billtrust expands connectivity to new third party and homegrown AP portals, keeping pace with their rapid proliferation. Accordingly, even if you are our only customer sending bills to a specific portal, we will typically accept that responsibility and use our data entry team to key your invoices into that portal. Billtrust's goal is to alleviate all of the demands on your Credit team to deal with any of these AP systems manually.

According to a recent survey of industry professionals conducted by Billtrust, the average accounts receivable (AR) team is uploading invoices into 11-20 accounts payable (AP) portals every month.
